

## ENVIRONMENTAL PROTECTION AND WASTE MANAGEMENT POLICY

As MONTANIA SPECIAL CLASS HOTEL and MONTANIA TOWN HOTEL MUDANYA family, we serve our environmental policy as YML, as all individuals should do with their proxies. But we have to do a little bit of environmental performance. We consider environmental protection and waste management policy under 3 headings;

1- Waste Management 2- Legal Conditions 3- Natural Resource Management

We allow packaging wastes to be collected and recycled separately as 'am, paper, plastic' separately by depolyor and authorized companies. We ensure that hazardous wastes are separated at the source separately from packaging wastes, and we record them and deliver them to authorized companies. Uncontrolled collection of hazardous wastes leads to air, water and soil pollution. MONTANIA SPECIAL CLASS HOTEL AND MONTANIA TOWN HOTEL MUDANYA have an environmental management system that includes all departments. Environmental contractors assigned in the B system work with consultancy firms approved and licensed by the Ministry of Environment and Urban Affairs. Internal audit reports, which should be done once a year, are prepared every month. Internal audit reports are evaluated at environmental coordination meetings. According to the day, it is ensured that it is renewed and the deficiencies are eliminated. In B meetings, possible changes in the situation are determined and necessary arrangements are made before they enter into force. The wastes generated in our hotel are classified in accordance with the regulation and without errors and recycled or disposed of. Necessary trainings are given to all our teammates regarding B subjects. Thanks to the trainings, waste management is carried out with zero error. Considerable knowledge has been gained about environmental conservation and waste management. Within the framework of these conditions, our suppliers have also been provided by our environmental management system. Our suppliers can work with us after obtaining the necessary permissions. In our facility, hazardous wastes are collected in our hazardous waste storage area and disposed of on time in accordance with the regulation.
